SURFACE WEB VS DEEP WEB

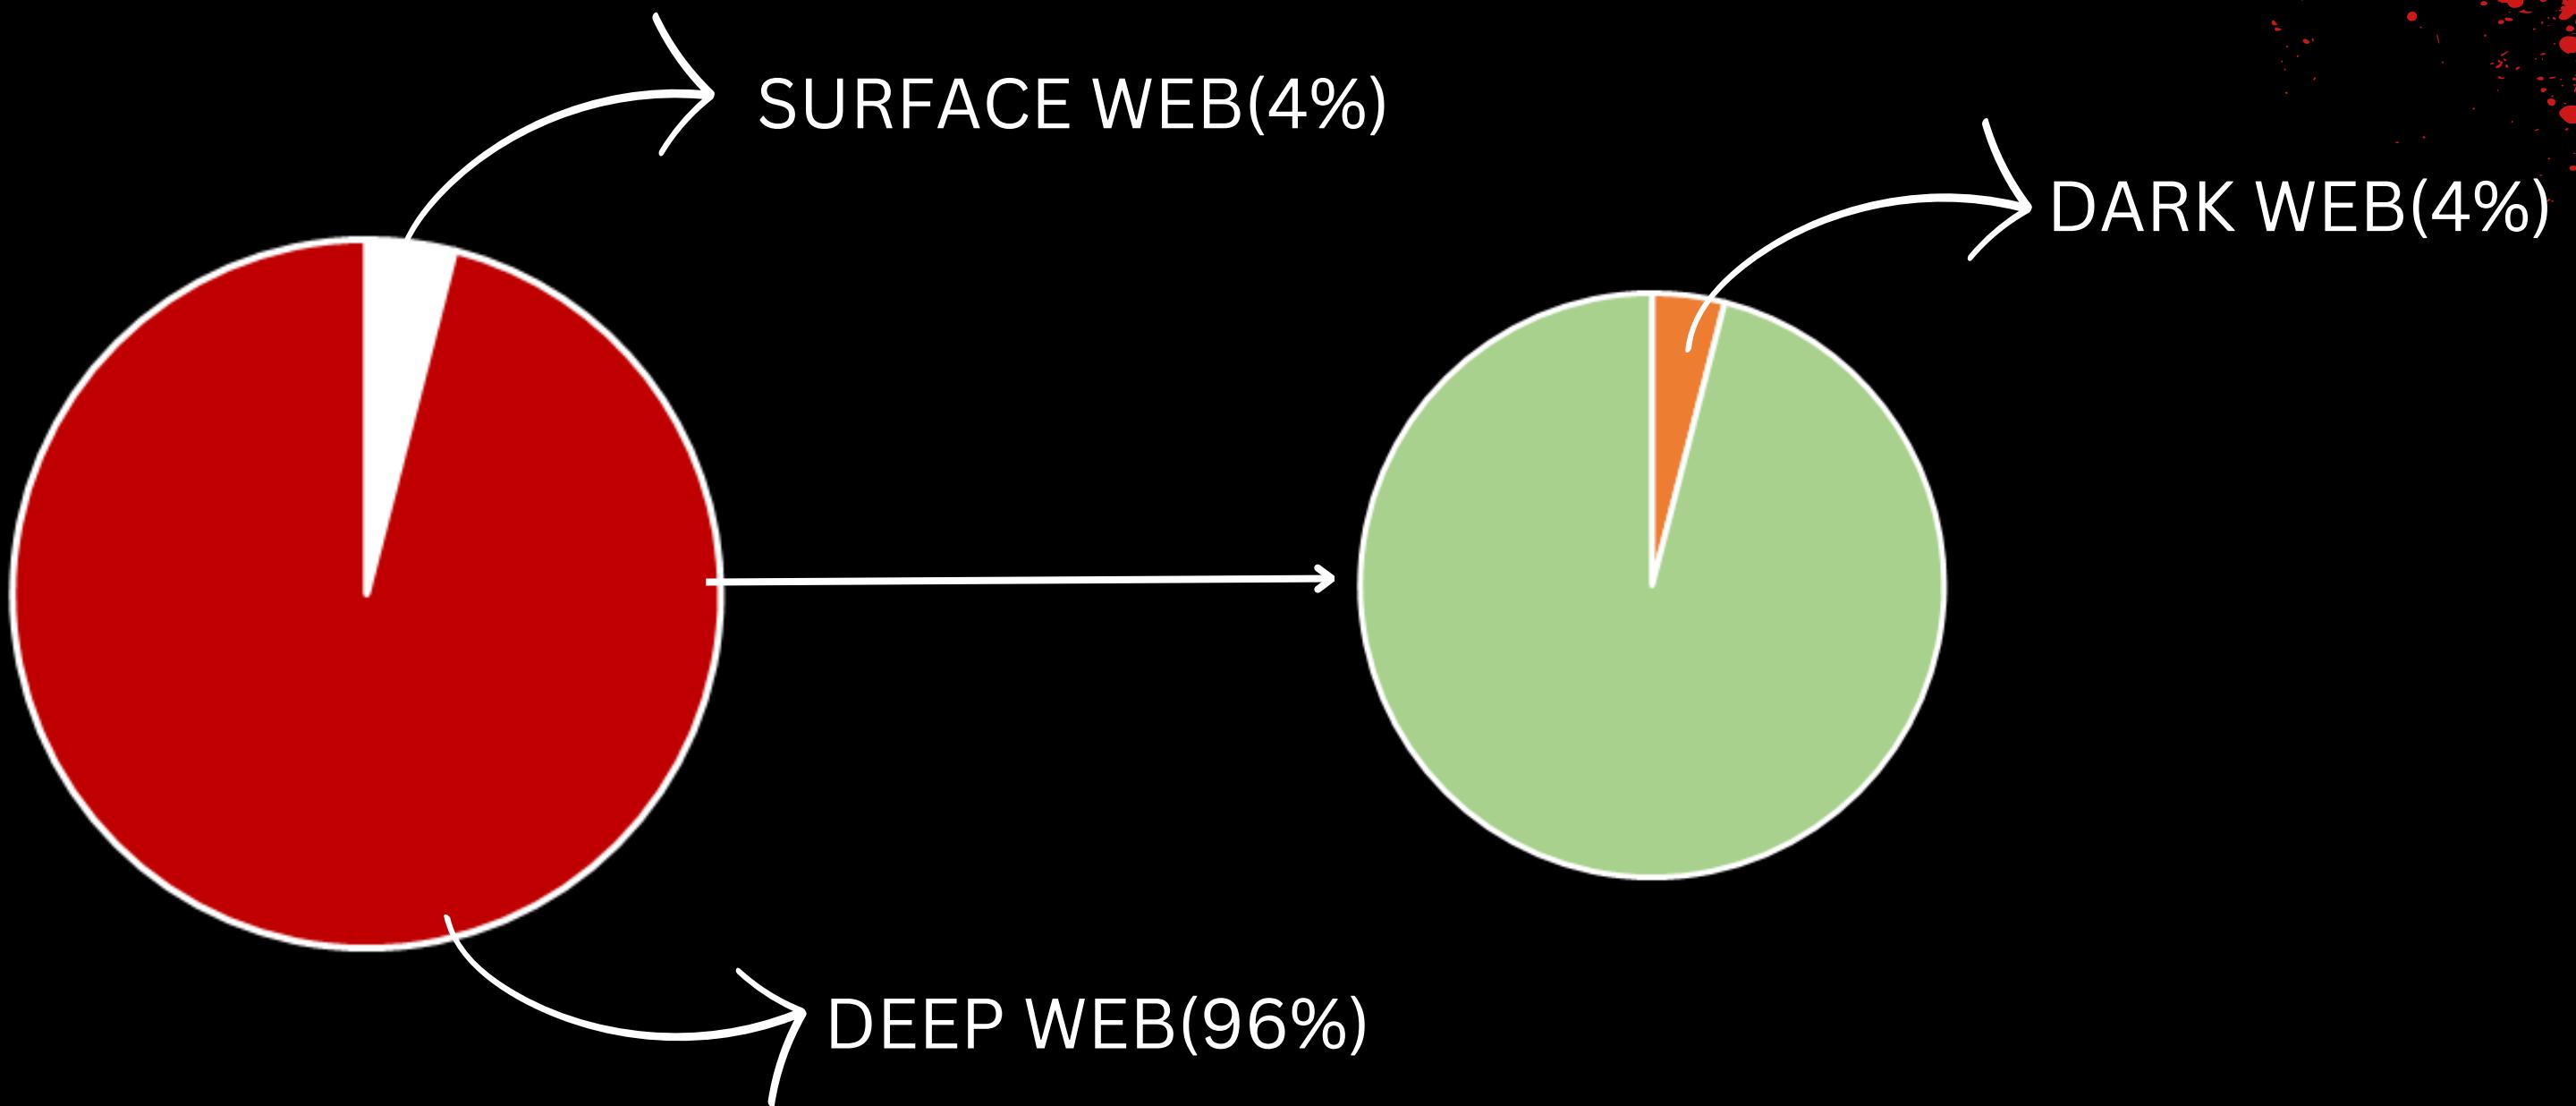

The Surface Web is the most well-known and accessible part of the internet.

If you can find it on a search engine, it's part of the Surface Web.

The Deep Web is a part of the internet that's not indexed by search engines.

90% of the information on the internet is part of the Deep Web.

SURFACE WEB VS DEEP WEB

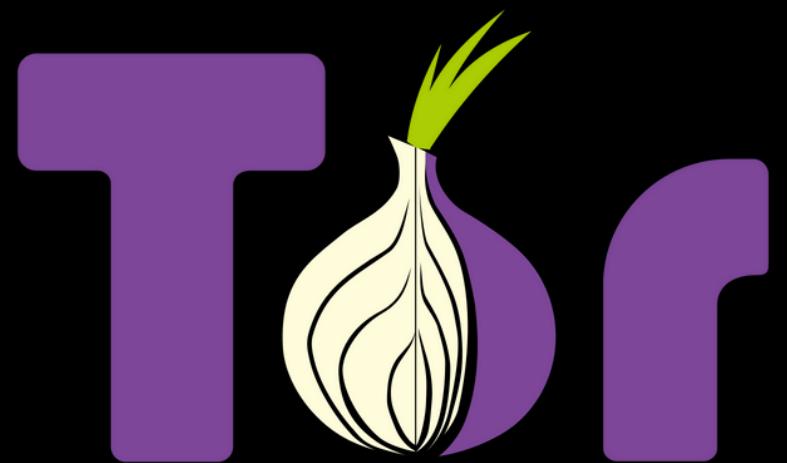

DARK WEB

The Dark Web makes up only about 0.01% of the internet.

The Dark Web was created for those who want to remain anonymous online and who need anonymity for legitimate purposes.

HOW TO ACCESS ?

Accessible through anonymizing networks like Tor and I2P which operates on Onion Routers.

IS DARK WEB DANGEROUS?

YES

- Sale and Purchase
- Hackers
- Assassin's
- Illegal Activities
- Silk Road
and many more.....

NO

- Government DataBases
- Anonymity & Security
- Corporate Information

MISCONCEPTION

- If Dark Web is too dangerous and illegal to use then the magnitude of users accessing it must be too low!! 
- The magnitude of users accessing the Dark Web on a weekly basis is more than 1 Million Users!! 

The Silk Road, an online marketplace for illicit goods, was responsible for about \$187 billion in sales between 2011 and 2013.

RED ROOMS

Red rooms are said to be websites where users can watch live streams of people being tortured and murdered in real-time.

According to sources collected in 2017, ISIS(Enemies of Humanity) cult is recognized as the one of the organization to operate Red Rooms.
